

New & Improved Patented Cell Design

ActivePure® Technology
Designed in the USA

The ActivePure Technology built into each Air Scrubber by Aerus® is based on a variation of the technology originally developed for use on the International Space Station and is recognized as the exclusive Certified Space Technology™ in its category.

Quality of Life Home Improvement Questionnaire

If you answer: YES to one or more of these questions, installing the Air Scrubber by Aerus in your home could improve your quality of life.

- | | | |
|---|------------------------------|-----------------------------|
| Are airborne irritants a problem in your household? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |
| Do you ever smell cooking odors, pet odors, or smoking odors in your home? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |
| Do you ever smell musty smells in your home? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |
| Would you like to reduce dust, mold, pet dander, or pollen in your home? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |
| Is there anyone in your house that can't afford to get sick? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |
| Would you like to reduce over 99% of contaminants on surfaces such as kitchen counter tops and bathrooms? | <input type="checkbox"/> YES | <input type="checkbox"/> NO |

Air Scrubber
BY AERUS
WITH CERTIFIED SPACE TECHNOLOGY™

Protect Your Indoor
Air and Surfaces 24/7

The Air Scrubber by Aerus® attaches directly to the HVAC system ductwork to reduce viruses, bacteria, and other contaminants in the ambient air and on surfaces in businesses and homes.

DISCOVER THE POWER OF ACTIVEPURE® TECHNOLOGY
Advanced surface and air purification technology.

PROTECTS 24/7

Our proprietary ActivePure Technology works to clean and protect surfaces and air 24 hours a day.

PROVEN EFFICACY IN BOTH LABORATORY STUDIES AND REAL-WORLD SETTINGS

ActivePure Technology is proven to reduce pathogens in the air and on surfaces.

and Engineered In the USA.

High Standards for Surface & Air Protection

Disinfect

REDUCE CONTAMINANTS

Do you worry about what is being brought into your home or business? Contaminants follow us on our hands, clothes and shoes and land on doorknobs, counter-tops and floors. Air Scrubber by Aerus® contains ActivePure® Technology, proven to reduce over 99.9% of all surface contaminants. Additionally, this breakthrough technology scrubs, purifies and cleans the air you breathe by reducing approximately 99.9% of airborne contaminants.

Purify

REDUCE PRESENCE OF IRRITATING PARTICLES

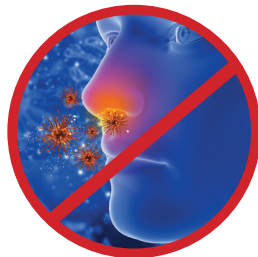

Dust, mold, pollen or many of the other pollutants can be a cause of irritation. These contaminants can be reduced with the Air Scrubber by Aerus. ActivePure Technology uses specialized light waves along with a proprietary catalytic process that creates scrubbing molecules of oxygen and hydrogen which purify the air around you and reduce the particles that can cause irritation.

Deodorize

BANISH LINGERING ODORS

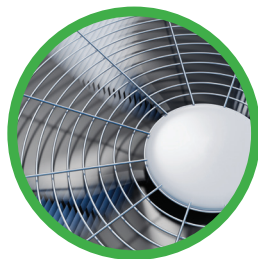

There's not much you can do to prevent some of life's odors, but now there's something you can do about them. Working through your heating and air conditioning unit, the Air Scrubber by Aerus is a photocatalytic device that will significantly reduce dust, pet dander and odors in your living environment. You will be able to reduce common smells such as garbage, pet odors, cigarette smoke, paint and the musty smell from mold and mildew.

Protect

EXTEND THE LIFE OF YOUR HVAC SYSTEM

Air Scrubber by Aerus can extend the life of your existing heating and air conditioning system by helping improve the efficiency of your HVAC system's return air filter. Preventing dust and debris from bypassing the filter and damaging the coils and blower, can keep your system running effectively. A protected HVAC system can last longer, save you money on your utility bill and reduce the need for expensive service calls.

Quick Facts:

- Provides 24/7 surface decontamination and air purification without the use of ozone
- Protects your heating and cooling system from potential buildup
- Our proprietary ActivePure® Technology uses high-intensity UVC light and a catalytic process to produce scrubber ions and hydro-peroxides that inactivate contaminants on surfaces and in the air
 - Advanced ActivePure Technology protects and purifies the environment around you
 - Installed by a professional directly into the existing HVAC system ductwork
- Requires only 17 watts of electricity
- Proven effective in homes, businesses, schools, public facilities, healthcare facilities, athletic facilities, hotels, meeting spaces, and more
- Air Scrubber by Aerus®, Model A1013U CARB Certified (ozone free)
- Conforms to UL STD 1598
- Proudly Designed, Developed and Engineered In the U.S.A. 

Certified Space Technology to Help Protect Indoor Spaces

WHAT IS ACTIVEPURE® TECHNOLOGY?

- Our proprietary ActivePure Technology uses light waves and a catalytic process to produce super oxide molecules and hydro-peroxides that inactivate contaminants on surfaces and in the air
- Advanced ActivePure Technology protects and purifies the environment around you 24/7
- ActivePure Technology proactively reduces bacteria, mold, fungus, and viruses in the air and on surfaces, including bird and swine flu, the corona cold virus, and the virus that causes COVID-19

HOW CAN IT HELP YOU?

- Works 24/7 to protect from surface and air contaminants
- Reduces irritants in the air
- Purifies surfaces and air, reduces odors
- Reduces VOC gases, smoke and odors in the air

The Certified Space Technology logo is licensed to Aerus by the Space Foundation for use of Air Scrubber by Aerus® purification products. The Space Foundation recognizes products whose origins come directly from technology or resources derived from the space programs.

ActivePure® Is Technology With Integrity and a History of Nearly 100 Years of Innovating to Meet the Needs of Today and Tomorrow

Advancing the fight against pathogens in the air and on surfaces since 1924.

Using technology developed for use in space exploration, ActivePure® Technology has changed indoor air quality and surface standards.

We have pushed for policies that consider the wellbeing of families, students, customers, employees, and the environment first and foremost.

Our commitment to creating the purest indoor space possible is deeper than this moment in time—it is decades of laboratory testing, it is iteration upon iteration of our devices, and it is generations of a family invested in environments free from concerns of pathogens.

PROOF IT WORKS

In extensive unaffiliated lab testing, ActivePure Technology has been proven to significantly reduce the following contaminants and pathogens:

- | | | | |
|--------------------------|--------------------------|----------------------------|--------------------------------|
| • SARS-CoV-2 – RNA Virus | • MRSA | • Erwinia herbicola | • Aspergillus niger endospores |
| • H1N1 Influenza | • E. coli | • Listeria monocytogenes | • Methicillin-resistant |
| • H5N8 Influenza | • Salmonella enterica | • Candida auris | • Staphylococcus epidermis |
| • Murine Norovirus | • Legionella pneumophila | • Botrytis cinerea | • Staphylococcus epidermidis |
| • PhiX-174 | • Clostridium difficile | • Sclerotinia sclerotiorum | |
| • MS2 Bacteriophage | • Bacillus globigii | • Aspergillus versicolor | |

View test results at www.airscrubberbyaerus.com/Scientific-Proof

ActivePure® Technology does not replace the need to follow public health guidelines and should be used as complementary technology. ActivePure Technology has been tested in controlled independent 3rd party labs for reduction of particulates in the air and contaminants on surfaces.
